Nutrition and feeding of the broodmare

Welcoming address

As organisers of the 3rd EWEN Congress, we have the honour and great pleasure to welcome you in Campobasso(I). We are committed to do our best to make this conference memorable for each one of you.

The theme of the 3rd EWEN was stated by the Nutrition Working Group of the EAAP horse commission and focuses with "Nutrition and feeding of the broodmare".

The scientific programme is expected to address the interests of the animal scientists and practitioners from European countries and from other parts of the world particularly involved in horse production.

It will be presented in 4 sessions together with poster sessions and one round table.

The scientific program will be enriched by a conference tour.

This gathering offers the possibility for scientists and practitioners to meet, share their scientific results and field experiences with one another.

A special programme for accompanying persons, social events and post-conference tour will be organised.

Dear colleagues, the Organising and Scientific Committees cordially invite you to Molise University in Campobasso(I) to enjoy the 3rd European Workshop on Equine Nutrition.

3rd European Workshop on Equine Nutrition

Nutrition and feeding of the broodmare

A circle of old houses, marked by time. An oasis of silence just steps away from the highway. A journey to Molise provides a wealth of old sensations. There is no concession to virtual travel, which immersed in brochures is otherwise void. Whoever undertakes a journey to this land must know that its history and nature do not leave one indifferent. Journeying through the landscapes and the hearth of the cities, across mountains, archaeological areas and rivers, the traveller is predominantly struck by a sense of privilege. From Termoli to Sepino and from the Adriatic sea to the Matese Massif, an itinerary that traverses the entire province of Campobasso, on a quest for Romanic churches, castles, historical towns and oases of nature, touching the ruins that are perhaps the most picturesque in Italy. Campobasso is the capital of Molise Region and province; it is unique for art and nature. The historical centre is of Longobard origin and it is characterised by small alleys that go towards the Monforte castle, the symbol of the town. Campobasso is characterized by neoclassic monuments such as the Cathedral. Campobasso and Molise Region are leader in wrought iron manufacturing. In Molise you can enjoy a romantic and breathing journey among Roman vestiges and Samnite theatres, immersed in the moving beauty of the countryside discovering Italy's origins. Village after village, among the mountains and hills, one on one with an unknown Appennine and its people. A genuine, savoury and simple cuisine with its typical homemade pasta, cheese and dried sausages will complete an unforgettable journey.
